ENGINEERING PROJECT MANAGER

WE OFFER:

- Interesting opportunity inside a top Tier-1 in the automotive industry.
- Quick introduction at the germany-located project team and product knowledge, during the first three to six months.
- Position located in Tarragona area after the introductory phase.
- Top level environment and direct contact with the customers at german vehicle manufacturers and developers.
- Training and managing by weOptimize, aligned with PMI® standards.

RESPONSIBILITIES:

- Direct and manage the development of electronic modules, coordinating the engineering project team activities.
- Primary contact with the customer and other key stakeholders for the engineering aspects of the project.
- Project planning (schedule, budget) in collaboration with the project team.
- Diligent management of project risks, issues and escalation when appropriate, ensuring timely and flawless project delivery.
- Periodical reporting of project progress to the top management.

QUALIFICATIONS:

- University degree in engineering (industrial, electrical, information technologies or comparable).
- At least 3 years working experience in project management or coordinating teams in a technical context.
- Strong communication skills.
- Fluent German and Spanish.
- Strong interpersonal skills.
- Ability to learn, understand, and apply new technologies.
- Critical thinking and problem solving skills.

Advantage:

- Automotive experience.
- English, French knowledge.
